

HIGH SECURITY MADE SIMPLE

Keyless access control solutions that improve operational efficiencies while protecting business critical assets.

Access control security solutions for cabinets, shelters, shrouds, poles, and gates. The SES system provides efficient, secure, and authorized access to sites anywhere in the world.

WITH SES'S SECURITY SOLUTIONS YOU CAN QUICKLY AND SIMPLY:

- Grant or Revoke Site Access Permissions
 - Allow On-Demand or Define Specific Time Slots
 - Review Full-Feature Audit Trail Reporting
 - Improve Efficiencies and Reduce Field Service Costs
 - Support Active Compliance Management and Reduce Liability Risk
- ...ALL FROM YOUR SMARTPHONE!

THE SES ADVANTAGE

KEYLESS ENTRY

- Eliminates physical key management
- No rekeying and core change outs
- Reduces risk of key copying and theft
- Decrease time, cost, and risk

REAL-TIME ACCESS CONTROL MANAGEMENT

- Significantly reduce operation center overhead
- Preauthorized access to streamline service time
- Improved site protection

ON-DEMAND GUEST ACCESS AUTHORIZATION

- Quickly grant site access to a guest at a remotely located site
- Eliminates unnecessary disruptive site visits

SITE ACCESS AUDIT TRAIL

- Customized reporting and data analytics
- Optimize service operational efficiencies
- Service call verification
- Time management oversight

INTEGRATED ACCESS

ALARM MANAGEMENT

- Reduce unnecessary expenses, site visits, and disruptions from false alarms
- Alarm notification only if real breach
- More efficient use of resources
- Improve response time to protect and maintain critical site operations

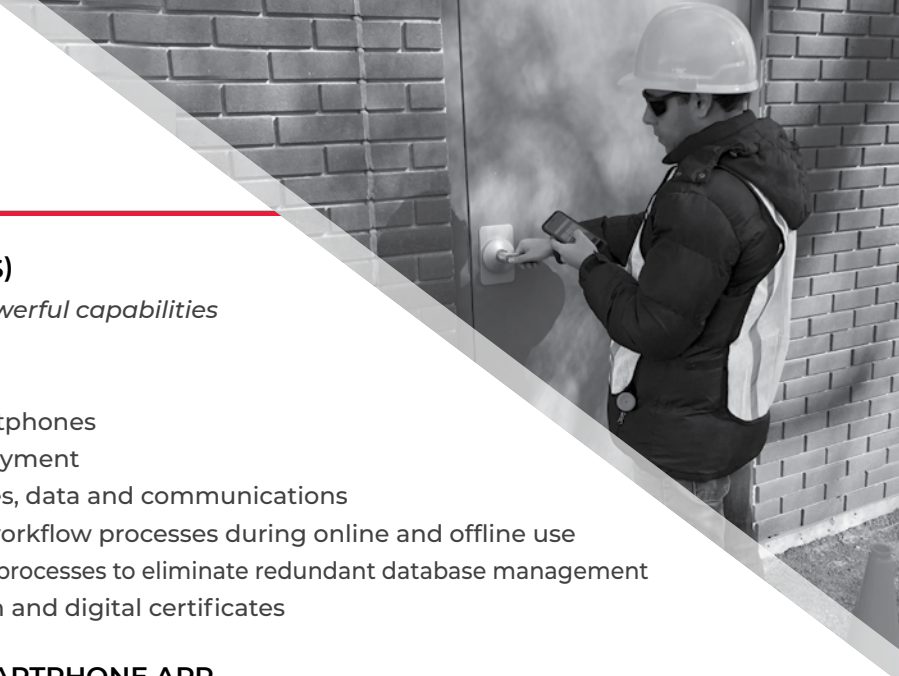

SINGLE SIGN-ON ACCESS

- Single sign-on multi-client site access control
- Streamlines access for co-located sites
- One App - One Logon - Multiple Clients Co-Located Sites

ACTIVE COMPLIANCE MANAGEMENT

- Liability risk mitigation during site access process
- Verify training certification and currency
- Safety & Personal Protective Equipment Checklist

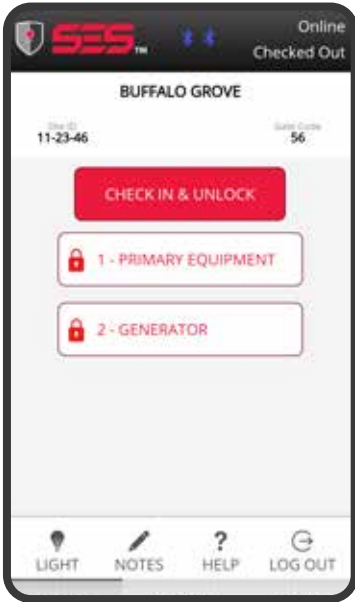

OUR SOLUTIONS

IDENTITY AND ACCESS SOFTWARE (IAS)

Our secured enterprise software delivers powerful capabilities wherever you are.

- Available on any device
- Communicates with on-site locks via smartphones
- Cloud-based or on-premise software deployment
- Real-time end-to-end application interfaces, data and communications
- Enforces applicable security policies and workflow processes during online and offline use
- Integrates with your data, alarm systems and processes to eliminate redundant database management
- Data protected by high security encryption and digital certificates

mIAS SMARTPHONE APP

Put technician access control and intrusion alarm management in the palm of your hand with our easy-to-use mobile app.

- Manages alarms and locks doors with one screen touch
- Connects seamlessly to IAS and Bluetooth®-enabled on-site locks
- Compatible with Android OS 4.3 and Apple iOS 9.0 or higher

ACCESS CONTROL UNITS

Built to withstand the most challenging environments, our ACUs help you manage door security more efficiently.

- Control one to sixteen doors with a single ACU
- Military-grade encryption and anti-spoofing security
- Fire-resistant, space-efficient enclosure for surface or rack mounting
- NEBS and UL certified
- Internal battery backup with extended power-loss operation

HIGH SECURITY LOCKING HARDWARE

Whether you're securing poles, cabinets or shelters, we offer the most rugged protection for your remote assets.

POLE AND CABINET LOCKING HARDWARE

SES INTEGRATED LOCKS
The highest pole and cabinet security solution for single and multi-door applications.

SES SMART PUCK
Reliable security for doors with padlock or pucklock hasps

SES HIGH SECURITY VAULT
Fast, affordable protection for securing keys or tools on-site

SHELTER LOCKING HARDWARE

- Behind-the-door locking mechanisms
- Fail-safe technology
- Patented freewheeling lever function
- Anti-pry door strike and anti-drill technology
- Single, triple and six-point locking mechanism
- Latch guards and hinge protectors
- Safety standards compliant

ABOUT SECURITY ENHANCEMENT SYSTEMS

SES provides highly innovative end-to-end remote access solutions that deliver significant field service efficiency improvements while reducing risk and protecting critical infrastructure assets. SES's security products currently protect tens of thousands of geographically dispersed sites while seamlessly integrating with customers' enterprise data, alarm systems, and internal processes. SES's software, electronics, and high-security locks give authorized users on-demand and time-limited access to remote assets, thereby maintaining unprecedented levels of security and helping operations understand the who, when, where and why of every site visit - all from their smartphone.
