

Mobile Identity & Access Software App

Built for Efficient Real-Time Remote Access Control from your Mobile Device

Access your remote assets with a single, scalable mobile software app. The mobile Identity and Access Software (mIAS) app is a keyless solution that communicates with SES's high security access control hardware allowing you to seamlessly manage remote site access while gaining new operational efficiencies.

Mobile Device is your key

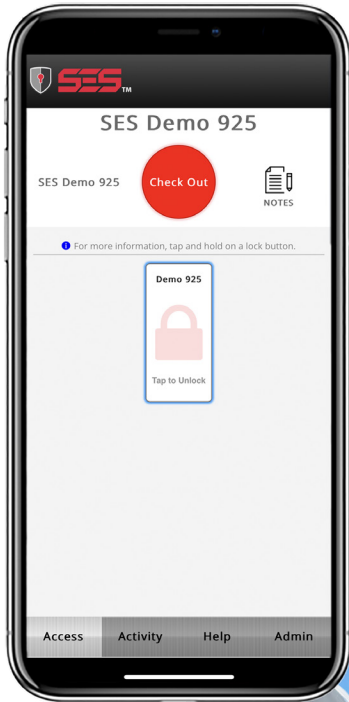

No need for physical keys! With your Android or IOS smartphone or tablet, you can easily access doors, generate site activity reports, perform offsite check-ins, view lock battery diagnostics, and generate remote access codes. See the status of all site and locking devices – all from your smartphone!

Mobile App mIAS

Via the mIAS phone app, a phone or tablet enables site personnel to greatly simplify and optimize daily work routines. The mIAS phone app provides the power to help authorized personnel understand the Who, Where, When, and Why of field service activity at every site. The mIAS app walks the user through the process of site access, report generation, offsite check-in and other administrative functions. The mIAS app works as a conduit to connect with customer specific enterprise data systems, alarm systems and on-site security hardware.

Key Features

- On-demand Keyless Online and Offline Access
- Automatic Door Alarm Suppression and User Check-In
- Highly Intuitive Interface with Clear Concise On-Screen Instructions
- Grant Guest User Access Remotely
- Off-Site Check-In
- Electronically Record Site Specific Notes
- Military-Grade Encryption and Security

Mobile Identity & Access Software App

Key Benefits

- Cost and Time Savings Gained by Eliminating Physical Keys: Key Distribution, Chasing Down Lost Keys, Keys Left in the Wrong Hands and Costly Key Core Change Outs
- Integrates with Customer Back-End Systems to Streamline Site Access Eliminating the Need to Call NOC Personnel or Use Interactive Voice Response Systems for Site Access
- No Training Required for Basic Use
- Eliminates Truck Rolls and Vendor Escorts for Site Access Support
- Remotely View Site Access Activity in the Palm of Your Hand – mIAS is the Site Access Logbook
- Ensures Important Site Information is Available to Anyone Accessing the Site

About Security Enhancement Systems

SES provides highly innovative end-to-end remote access solutions that deliver significant field service efficiency improvements while reducing risk and protecting critical infrastructure assets. SES's security products currently protect tens of thousands of geographically dispersed sites while seamlessly integrating with customers' enterprise data, alarm systems, and internal processes. SES's software, electronics, and high-security locks give authorized users on-demand and time-limited access to remote assets, thereby maintaining unprecedented levels of security and helping operations understand the who, when, where and why of every site visit - all from their smartphone.
