Security Enhancement Systems

Keyless access control to efficiently manage and protect high-value critical infrastructure and remote assets

SES

Johnson Controls

Access control security solutions for buildings, shelters, mobile assets, cabinets, enclosures and gates. The SES system provides efficient, secure, and authorized access to geographically dispersed sites most anywhere.

With SES's Security Solutions you can quickly and simply:

- Grant or Revoke Site Access Permissions
- Allow On-Demand Access
- Review Full-Feature Real-Time Audit Trail Reporting
- Improve Efficiencies and Reduce Field Service Costs
- Support Active Compliance Management and Reduce Liability Risk

…ALL FROM YOUR SMARTPHONE!

The SES Advantage

KEYLESS ENTRY

- Eliminates physical key management
- No rekeying and core change outs
- Reduces risk of key copying and theft
- Decrease time, cost, and risk

REAL-TIME ACCESS CONTROL MANAGEMENT

- Significantly reduce operation center overhead
- Preauthorized access to streamline service time
- Improved site protection

ON-DEMAND GUEST USER ACCESS AUTHORIZATION

- Quickly grant site access to a guest user at a remotely located site
- Eliminates unneccessary truck rolls

SITE ACCESS AUDIT TRAIL

- Customized reporting and data analytics
- Optimize service operational efficiencies
- Service call verification
- Time management oversight

INTEGRATED ACCESS ALARM MANAGEMENT

- Reduce unnecessary expenses, site visits, and disruptions from false alarms
- More efficient use of resources
- Improve response time to protect and maintain critical site operations

Our Solutions

Identity and Access Software (IAS)

Our secured enterprise software delivers powerful capabilities wherever you are.

- Available on any device
- Communicates with on-site locks via smartphones
- Cloud-based
- Real-time end-to-end application interfaces, data and communications
- Enforces applicable security policies and workflow processes during online and offline use
- Integrates with your data, alarm systems and processes to eliminate redundant database management
- Data protected by high security encryption and digital certificates

mIAS Smartphone App

Put technician access control in the palm of your hand with our easy-to-use mobile app.

- Manages door locks with one screen touch
- Connects seamlessly to IAS and Bluetooth®-enabled on-site locks
- The SES mIAS app only supports versions of Apple iOS and Google Android operating systems that currently receive security updates. Minimum platform requirements are subject to change as Apple and Google end their support of older versions.

Access Control Units

Built to withstand the most challenging environments, our access control units help you manage door security more efficiently.

- Military-grade encryption and anti-spoofing security
- Fire-resistant, space-efficient enclosure for surface or rack mounting
- NEBS and UL certified
- Internal battery backup with extended power-loss operation
- Supports universal +/- DC power inputs

HIGH SECURITY LOCKING HARDWARE

Whether you're securing buildings, cabinets or shelters, we offer the most rugged protection for your remote assets.

SES BLUETOOTH SMART PUCKLOCK

- Secures cabinets, generators, gates, enclosures and mobile assets

- Vastly more secure than external shackle padlocks
- Hidden shackle design and 304 stainless steel body renders bolt and lock cutters useless
- Environmentally sealed from debris, water, and extreme temperatures
- Compatible with standard and cabinet pucklock hasps

PERSONNEL DOOR LOCKING HARDWARE

- Behind-the-door locking mechanisms
- Fail-safe technology
- Patented freewheeling lever function
- Anti-pry door strike and anti-drill technology
- Single and multi-point locking mechanism
- Latch guards and hinge protectors
- Safety standards compliant

SES HIGH SECURITY PUCKLOCK VAULT

Fast, affordable protection for securing keys or tools on-site

About Security Enhancement Systems

SES provides highly innovative end-to-end remote access solutions that deliver significant field service efficiency improvements while reducing risk and protecting critical infrastructure assets. SES's security products currently protect tens of thousands of geographically dispersed sites while seamlessly integrating with customers' enterprise data, alarm systems, and internal processes. SES's software, electronics, and high-security locks give authorized users on-demand and time-limited access to remote assets, thereby maintaining unprecedented levels of security and helping operations understand the who, when, where and why of every site visit - all from their smartphone.
